CAREER OBJECTIVE

AI-Driven Full Stack Developer with 3+ years of experience building scalable web, mobile, backend, and AI-powered applications. Skilled in Flutter, Next.js, React, Laravel, Django, ASP.NET Core, Supabase, PostgreSQL, MySQL, Redis, Docker, and modern DevOps workflows. Hands-on experience delivering multi-tenant SaaS platforms, e-commerce systems, logistics products, fintech workflows, healthcare backends, and AI solutions using LLMs, RAG, AI agents, and voice AI. Strong across the full product lifecycle including architecture, development, testing, optimization, deployment, maintenance, and production enhancements.

EDUCATION

- **Information Technology (IT)**
Karaikal Polytechnic College of Engineering, Karaikal – 2019 – 2022 – Mark 80%
- **Higher Secondary Certificate (H.S.C)**
Thiruvalluvar Higher Secondary School, Ambagarathur – 2018 – Mark 49%
- **Secondary School Leaving Certificate (S.S.L.C)**
Sriman Narayanan English School, Thamanagudy – 2017 – Mark 59%

FULL STACK & AI DEVELOPER

AMAZE-TECH CLANS LTD – Senior Full Stack & AI Developer

April 2023 – Present | Karaikal, India

- Develop and maintain Full Stack web, mobile, backend, and AI-powered applications using Flutter, Laravel, Next.js, React, Django, Supabase, and related technologies.
- Design scalable backend systems, APIs, database schemas, and business workflows for SaaS products and enterprise applications.
- Build AI-enabled features using LLMs, RAG pipelines, AI agents, voice AI, and automation logic.
- Contribute across architecture, development, testing, deployment, optimization, enhancement, and production support.
- Worked across e-commerce, logistics, fintech, healthcare, governance, learning platforms, AI systems, and multi-tenant SaaS platforms.

Selected Project Contributions

- **Clara AI** — Built a multi-tenant RAG-powered AI platform with voice AI, knowledge-base ingestion, vector search, realtime conversations, subscriptions, and organization-level access control.
- **Enterprise Multi-Tenant Data Management Suite** — Developed a full stack SaaS platform for data governance, data quality monitoring, metadata discovery, tenant onboarding, and centralized administration.
- **ShopCMS Ecosystem** — Built a multi-tenant e-commerce SaaS platform with

SKILLS

Languages & Frameworks:

- Flutter
- Dart
- JavaScript
- TypeScript
- Python
- PHP
- C#
- Kotlin
- Java
- React.js
- Next.js
- Laravel
- Django
- ASP.NET Core

AI / Intelligent Systems:

- LLM
- Retrieval-Augmented Generation (RAG)
- AI Agents
- Voice AI
- OpenAI
- Gemini
- Qdrant
- TensorFlow
- Keras

Backend & APIs:

- Django REST Framework
- REST API Development
- GraphQL
- Supabase
- Firebase
- Celery
- Redis
- SignalR

Databases:

- PostgreSQL
- MySQL
- Microsoft SQL Server
- Supabase
- Firebase
- Redis

DevOps & Tools:

- Docker
- Kubernetes
- Git
- GitHub
- Jenkins
- Nginx

tenant onboarding, platform administration, template-driven storefronts, subscription-aware feature access, and Supabase-based data isolation.

- **BookWell API** — Engineered a multi-tenant healthcare backend with country-specific database routing, JWT auth, OTP integration, Celery/Redis task processing, and Dockerized deployment.
- **Nadir Ecosystem** — Built a Flutter mobile and web real estate investment platform with KYC onboarding, portfolio tracking, GraphQL-based data flow, wallet features, and financial dashboards.
- **TWSL Ecosystem** — Contributed to a logistics platform built with ASP.NET Core, Next.js, and Flutter for backend orchestration, role-based dashboards, real-time tracking, and delivery operations.
- **Megzy Ecosystem** — Customized and enhanced a 6AmMart-based multi-vendor delivery platform, upgraded Google Maps distance calculation, added order statuses, enabled languages, deployed web, and supported mobile app release.
- **Mutoon Talab AI-Ilm Ecosystem** — Enhanced and stabilized an incomplete learning platform across Flutter and Next.js applications by adding missing modules, Firebase CRUD flows, UI customizations, and 80+ fixes.
- **GAO API** — Maintained and deployed an enterprise governance backend built with Django REST Framework.
- **CarwaTaxi Ecosystem** — Enhanced a ride-hailing platform across backend, user app, and driver app through bug fixing, feature improvements, UI refinement, and workflow stabilization.

Freelance App Developer — Junior Developer

June 2022 – December 2023

- Built Android and web applications with a focus on performance, usability, backend integration, and responsive UI.
- Developed mobile features using Kotlin and Java and integrated Firebase and MySQL for real-time functionality.
- Built and integrated REST APIs, database-driven features, and deployment-ready web applications.
- Delivered maintainable, user-focused solutions tailored to business requirements.

KEY PROJECT STRENGTHS

- Multi-Tenant SaaS Architecture
- Full Stack Web & Mobile Development
- AI Integrations, RAG, LLM, and Voice AI
- Scalable Backend APIs and Database Design
- Flutter Cross-Platform Development
- React / Next.js Frontend Engineering
- Real-Time Systems and Notifications
- Production Enhancement, Maintenance, and Deployment

- Vercel
- Android Studio
- VS Code

Product & Architecture:

- Full-Stack Development
- Multi-Tenant SaaS
- Cross-Platform Development
- Mobile Application Development
- E-commerce Development
- Admin Panel Development
- Real-Time Systems
- Role-Based Access Control (RBAC)
- Payment Integration

Operating Systems:

- Android
- Windows
- Linux
- Mac OS

Cloud Services:

Basic understanding of

- AWS
- GCP
- Azure

COURSEWORK

- AWS for Beginners
- Azure Cloud Concepts
- Python (Basic)
- Introduction to Web Development
- Machine Learning with Python

OTHER TECHNICAL KNOWLEDGE

Docker & Jenkins
